

## PSA Sicherheitsmanagement GmbH – Your Partner for High-Level Physical Security in Germany

Founded in 1991 and still owner-managed to this day, PSA Sicherheitsmanagement GmbH stands for long-term expertise and trust in the field of physical security.

Over the decades, we have evolved into a highly specialized provider for the protection of data centers and corporate environments.

With deep-rooted knowledge in corporate security and the safeguarding of critical infrastructures, PSA is a trusted partner for companies operating in highly technological and mission-critical sectors.

One of our greatest strengths lies in our hands-on experience with data center environments, including physical penetration testing designed to uncover and mitigate potential security risks.

We support our clients in identifying vulnerabilities, optimizing processes, and minimizing risks—nationwide and during ongoing operations.

Through digitized workflows, targeted staff training, and client-specific strategies, we meet the demanding requirements of modern security operations—discreetly, efficiently, and with a customer-first mindset.

Our client-specific security strategies are aligned with industry-specific challenges to ensure operational continuity, regulatory compliance, and maximum protection—whether in data centers or corporate headquarters.

As a company driven by clear values and a high standard of quality, innovation, and responsibility, we understand that security is not a fixed state, but a continuous process of improvement.

Our membership in the Global Data Center Association (GDA) reflects our commitment to helping shape tomorrow's security standards through expertise and cooperation.

For us, "Security but better" is more than just a claim—it's our daily promise to deliver excellence, evolution, and trust-based partnerships.
