

Top Beveiliging BV

Top Beveiliging has established a strong profile since its founding in 2006. Over the years we have grown into a highly reliable and professional security firm with an impressive track record. Thanks to our quality communication, rapid response times and high customer review ratings, Top Beveiliging distinguishes itself from its direct competitors. With a large number of extremely satisfied clients we can confidently call ourselves a solid partner in our key service areas.

We are ISO 9001-2015 certified, hold the VPB quality mark, are a senior member of the Dutch Security Industry Association, certified under NEN 4400-1 and are recognised as an SBB training company.

TOP Beveiliging offers a wide range of services as shown in our list of key services. Regardless of the task we perform for you, professionalism, flexibility, continuity, and quality are always at the core. Alongside integrity and discretion, these are the key pillars of TOP Beveiliging. We view every assignment as a unique challenge that deserves our utmost attention and commitment.

We believe in a thorough approach and take time to understand our clients and their assignments. We map out your needs and wishes in detail to gain a clear picture of potential risk factors. Based on this input, along with our knowledge and experience, we develop a security plan tailored specifically to individual situations, including clearly defined tasks, authorities, and responsibilities so it can be finalised with the client.

Our working method is clear and transparent and we ensure our clients remain fully informed with updates. All tasks are recorded in work instructions, and we provide regular reports. Each situation is unique and requires a specific approach which is why we regularly evaluate our methods and adjust them accordingly. Once an assignment is completed we evaluate the entire process together with our clients.

For many businesses security and surveillance are not a principal element with existing threats often being unclear. TOP Beveiliging provides expert advice in this area and we identify all key factors recommending the most suitable solutions and clients ultimately decide which measures to implement. We are happy to advise on the ideal combination of solutions tailored to your situation.
